💼 Professional Summary:

A highly skilled and detail-oriented Python Developer with 3 years of experience in developing robust, scalable, and efficient applications. Proficient in using Python libraries such as Django, Flask, Pandas, and NumPy, with a strong background in web development, data analysis

- Quick Learner and Self-Motivated with excellent analytical and communication and interpersonal skills that are required to effectively work in the field of applications testing and maintenance. Experience
- in using version control tool Git and GitHub. Quick Learner and Self-Motivated with excellent analytical
- and communication and interpersonal skills that are required to effectively work in the field of applications testing and maintenance. Developed and maintained multiple Django-based web
- applications Optimized application performance by identifying bottlenecks and applying caching
- techniques and database indexing. Optimized SQL queries and database structure, leading to faster data retrieval and overall application performance
- improvements.

Technical Skills:

Programming Language:

- Python, Django
- SQL
- HTML5, CSS3
- Java Script

Libraries:

- Pandas,
- NumPY,
- Matplotlib

Tools:

- VS Code
- PyCharm
- GIT
- POSTMAN

💼 PROJECT 1

Project Name	:	Grafon
Domain	:	Health care
Role	:	Python Developer
Frameworks	:	Python, Django, Pycharm, Github, Jira

💼 PROJECT 2

Project Name	:	Quadro
Domain	:	E-Commerce
Role	:	Python Developer
Frameworks	:	Python, Django, Pycharm, Github, Jira

Description:

This is a web application that provides end to end business integration solution to clients. It offers an uninterrupted continuous Business Vertical integration to assist the business users to maintain, monitor and control everyday business activities. It also empowers clients to maintain an unbreakable information transfer channel with their customers thereby providing a positive thrust to their businesses.

Responsibilities:

Application Development:
- Develop, test, and maintain scalable and efficient Python applications.

Database Management:
- Design, develop, and maintain databases SQL, ensuring data integrity and performance.
- Write complex SQL queries and optimize database schema for high-performance applications.
- Implement database migrations and ensure compatibility across different environments.

Code Quality & Best Practices:
- Write unit and integration tests to ensure code quality and high test coverage.
- Conduct code reviews and provide constructive feedback to peers.
